- **And still even more features being continually added**

Give your library staff powerful features for management of your library

a) **Enriched OPAC Update** – Tools to continually update your library OPAC. Library staff shall be able to do much of the updates onto the OPAC page without the help of IT staff.

b) **Cataloguing** – Single page cataloguing yet meeting library software standards, One click cataloguing to get data from Union Catalogues, Customizable Reports and Statistics.

c) **Circulation** – Multiple book Issue, Return features, Built in SMS and eMail gateways, Circulation Reminders, Customizable Reports and Statistics

d) **Periodicals** – Manage journal subscriptions, automatic generation of receivables, get receipt and missing receipt reports, index the journal articles

e) **Reports and Statistics** – A few hundred pre-built reports and statistics, Ability to define and come up with your own reports and statistics

f) **Institutional Repository** – Manage your organizations digital subscriptions both paid and complimentary, build institutional repository of documents, index the articles and more

g) **Manage Library by Numbers (Dashboards)** – Define own Key Performance Indicators by rles and continually watch and monitor your library performance through dashboards.

h) **Batch Jobs -** Ability to schedule various jobs e.g. Due reminders, Birthday Greetings, New Arrival Alerts, Library Notifications etc.

i) **Barcode and ID Cards –** Print barcodes on A34 Sheet paper. Design id cards for students. Print them onto A4 sheet or export them for external printing.

j) **RFID Compatible** - Ability to issue multiple books with one keystroke, multiple issue return at once, Drop box compatible for self-service return etc.

k) **Display Board (Kiosk) Management** – Helps you manage library and campus wide display boards. From the library itself you can manage what is being displayed where.

l) **Data Quality Improvement** – Tools to identify errors in data entry and quickly fix them through mass updates. Ability to merge title, publishers, vendors etc.

m) **In Out Management –** Manage student / visitor entry to your library. Get statistics of visitor counts and trends by month, day, course, branch, member type etc.

n) **Additional Analytics** – Analyze circulation by authors, subjects, category of books, user profile, publisher, purchase date range, price of the book etc.

o) **Multiple Branch Management** – Form multiple branches, allow users to borrow from one branch and return at another branch, get reports by location, displacement etc.

And the list goes on and on. Over 600 customers trust Easylib as of February 2021. Join us!
